Message from the President

Dear Colleagues and Friends,

Dr. Biagio Adile has proposed Palermo, Italy as venue of the international meeting convened by the IPFDS and the FIGO Task Force on Pelvic Floor Medicine and Reconstructive Surgery. This Meeting will have two important aspects, firstly the academic one; it will gather International Opinion Leaders that will show their personal and worldwide experience on topics of permanent review. Secondly, the breathtaking views of Sicily will allow completing the attractiveness of this meeting.

The personal contact with friends and colleagues will complete the ideal framework of this event.

We look forward to seeing you all in Palermo.

Oscar Contreras Ortiz

IPFDS President

FIGO Task Force General Coordinator

Message from the Congress Presidents

Dear Colleagues,

Welcome to the 7th IPFDS Congress of the International Pelvic Floor Dysfunction Society hosted in Palermo. Palermo is the eternal city with its well known mixture of ancient grandeur and modern international metropolis.

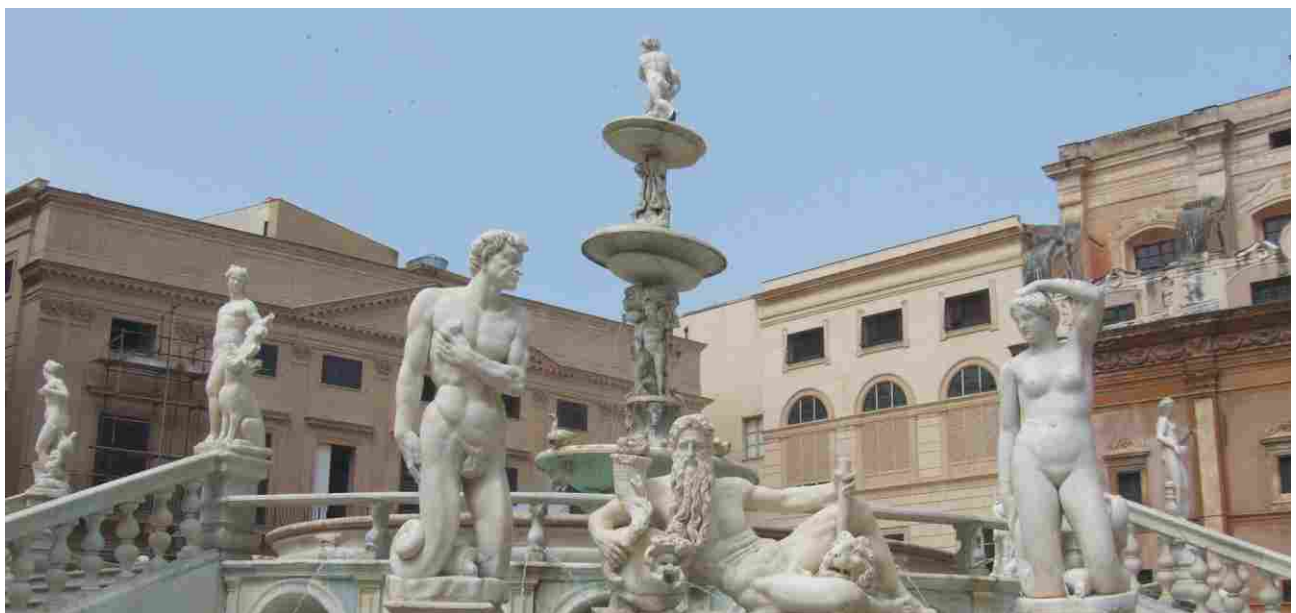

It has over 1.500.000 inhabitants with all the advantages and draw backs which such a large and cosmopolitan population brings. We hope that the high level of the Scientific program put together with the hard work of the Scientific Committee will not prevent you from taking a little time to visit at least a few of the most striking historical sites (Teatro Massimo, Palermo and Monreale Cathedrals, the beautiful Mondello).

The Scientific Program is becoming always richer and more varied. Beside the classical podium and poster sessions there are State of the Art Lectures and FIGO reports, Workshops and minisymposia. We wish to express our thanks to the major sponsors, supporters and exhibitors, which every year make this scientific event possible, particularly appreciated this year in a time of economic recession.

We look forward to welcoming you in our magnificent city and wish you a productive and enjoyable stay in Palermo.

Sincerely Yours

Biagio Adile – Antonino Perino
