

Genito-Urinary Tract Tumors

An Update in the Era of Personalized Therapy

Focus on emerging topics in bladder, ovary and testis

May 11th - 12th 2017

Florence - Italy

Location:

PREIS School, www.preischool.com/location
Istituto degli Innocenti, Piazza SS Annunziata,

Thursday, 11th May 2017

12.00 REGISTRATION

13.00 WELCOME LUNCH

14.00 INTRODUCTION

Maria Rosaria Raspollini and ***Antonio Lopez-Beltran***

Lecture The Sage Princess: Anna Maria Luisa de' Medici and the Medici legacy –

Donatella Lippi

14.30 SESSION1 - UPDATE IN URINARY BLADDER NEOPLASMS

Chairs: ***Antonio Lopez-Beltran*** and ***Rodolfo Montironi***

Attendees will acquire an update on molecular genomic advances in bladder cancer that are reshaping our approach to early detection, prognostication, and tailored therapy in bladder cancer. The taxonomy of basal versus luminal genotype/phenotype and immunotherapy promise will be discussed.

14.30 The 2016 WHO news in bladder pathology

Antonio Lopez-Beltran

14.55 pT1 high grade bladder carcinoma

Maria Rosaria Raspollini

15.20 Unusual Variants in Bladder Cancer

Rodolfo Montironi

15.45 Immune checkpoint pathway in bladder carcinoma

George Netto

16.10 Coffee break

16.30 Iatrogenic changes in the bladder

Rodolfo Montironi

16.55 Molecular Advances bladder cancer: Novel Genomic Based Prognostics and Predictors

George Netto

16.20 Q & A

Tel.: +39 02 34934404

20143 Milano

Genito-Urinary Tract Tumors

An Update in the Era of Personalized Therapy

Focus on emerging topics in bladder, ovary and testis

May 11th - 12th 2017
Florence - Italy

- 16.45 Slide seminar: Unusual cases and pitfalls in bladder pathology with digital slides (interactive with audience)
Antonio Lopez-Beltran and **Rodolfo Montironi**
- 17.45 Concluding remarks

Friday, 12th May 2017

9.00 SESSION 2 - TUMORS OF OVARY AND TESTIS (PART 1: THE OVARY)

Chairs: **Xavier Matias-Guiu** and **Glenn McCluggage**

Ovarian tumors are a heterogeneous group of lesions. Understanding this heterogeneity is crucial for individualizing managements of the patients: participants will acquire the pathologic basis of ovarian cancer, and the main clues for classifying appropriately the tumors, and the molecular features of the most common type of ovarian cancer (high grade serous carcinoma), including those associated with prognosis, prediction to response to platinum based therapy or immunotherapy.

- 9.00 Evolving understanding of the origin of high grade serous carcinoma and main clues for classifying appropriately the tumors
Glenn McCluggage
- 9.25 Ovarian Mucinous tumors
Sigurd Lax
- 9.50 Metastatic tumors to the ovary
Xavier Matias-Guiu
- 10.15 Endometriosis associated ovarian neoplasms
Sigurd Lax
- 10.40 Coffee break
- 11.00 Molecular features of the most common type of ovarian cancer including those associated with prognosis
Xavier Matias-Guiu
- 11.25 Mechanisms of resistance to platinum-based therapies and immunotherapy in ovarian carcinoma
Xavier Matias-Guiu
- 11.50 Diagnostic challenges of low grade and high grade ovarian serous carcinomas
Glenn McCluggage
- 12.15 Update on ovarian sex cord-stromal tumors
Glenn McCluggage

Tel.: +39 02 34934404

Genito-Urinary Tract Tumors

An Update in the Era of Personalized Therapy

Focus on emerging topics in bladder, ovary and testis

May 11th - 12th 2017

Florence - Italy

12.40 Germ cell tumor of the ovary

Xavier Matias-Guiu

13.05 Q & A

13.30 Lunch break

14.30 Slide Seminar: Unusual cases and pitfalls in ovarian tumors with digital slides –
(interactive with audience)

Xavier Matias-Guiu, Glenn McCluggage, Sigurd Lax

15.30 SESSION 3 - TUMORS OF OVARY AND TESTIS (PART 2: THE TESTIS)

Chairs: **Antonio Lopez-Beltran** and **Maurizio Colecchia**

Attendees will increase their knowledge on 2016 WHO news in testis pathology in regard to the understanding, the classification, the immunohistochemistry, and the genetic of tumor of the testis with emphasis on histologic features and molecular data which are clue for the selection of the therapy.

15.30 Specimen handling and staging issues

Maurizio Colecchia

15.55 Seminoma and spermatocytic tumor

Maurizio Colecchia

16.20 Non-seminomatous germ cell tumors of the testis

Antonio Lopez-Beltran

16.45 Non-germ cell tumors of the testis and tumors of paratesticular structures **George Netto**

17.10 Coffee break

17.30 Histologic features related with the selection of therapy

Rodolfo Montironi

17.55 Molecular pathology of germ cell tumors: approach for tailored therapy

George Netto

17.20 Q & A

17.45 Slide seminar: Unusual cases and pitfalls in testicular tumors with digital slides -
(interactive with audience)

Antonio Lopez-Beltran, Maurizio Colecchia and **Rodolfo Montironi**

18.45 Concluding remarks

End of the course

Tel.: +39 02 34934404
